Discussion Prompts

- **On Innovation:** What trends in financial technology or FinTech are you seeing today. How could these trends impact the marketplace ten to fifteen years from now? What might be the impact for consumers as the market evolves?
- **On Inclusion:** Do you believe there are regulatory issues that should be addressed at the federal-level to promote greater access to consumer financial products or services to underserved individuals and/or communities?
- **On Competition:** Do you believe the Bureau has a role in promoting competition, innovation, and consumer choice in the marketplace, while at the same time furthering its mission of consumer protection? Are there examples of state or foreign regulators that have successfully balanced these goals?
- **On Regulatory Modernization:** Do you believe there are gaps in financial regulations; redundancies in financial regulations; or areas of financial regulation where additional clarity is needed. If so, what are they? And where are there opportunities for improved coordination between federal and state regulators, specifically from the perspective of regulated entities and consumers?
- **On Research:** Are there new areas of research that the Bureau should consider undertaking or expanding on in the consumer financial marketplace?
