

March 20, 2020

## Recommendation memorandum for the Director

<b>FROM</b>	Matt Cameron, Taskforce Staff Director, <b>Redacted</b>
<b>THROUGH</b>	Andrew Duke, Policy Associate Director, External Affairs and CEE Kirsten Sutton, Chief of Staff, Bureau Front Office
<b>SUBJECT</b>	Request for Information to Assist the Taskforce on Federal Consumer Financial Law

## Recommendations

The Taskforce Staff Director recommends that you:

1. Review and sign the attached Decision Memorandum (Tab 1), which would (a) authorize the release and publication in the *Federal Register* of a Request for Information to Assist the Taskforce on Federal Consumer Financial Law (RFI, Tab 3); and (b) delegate authority to staff to make non-substantive changes prior to publication; and
2. Sign the attached three signature pages in blue ink (Tab 2).

## Timing Considerations

There are no statutory or other external deadlines for the issuing the RFI. The Taskforce is expected to deliver its findings to the Director within a one-year timeframe. The RFI will remain open for public comment until Wednesday, May 20, 2020. Thus, the Taskforce Staff Director recommends releasing the RFI on March 24, 2020 to ensure that the public has enough time to provide thoughtful responses.

## Background

In January 2020, the Director established the Taskforce on Federal Consumer Financial Law (Taskforce) pursuant to the executive and administrative powers conferred on the Bureau by

sections 1013(a) and 1021(c) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The Taskforce is charged with (1) examining the existing legal and regulatory environment facing consumers and providers of consumer financial products and services; and (2) reporting its recommendations for ways to improve and strengthen Federal consumer financial laws, including recommendations for resolving conflicting requirements or inconsistencies, reducing unwarranted regulatory burdens in light of market or technological developments, improving consumer understanding of markets and products and services, and identifying gaps in knowledge that the Bureau should address through future research. Where possible and within time constraints, the Taskforce's report may include recommendations relating to the 18 enumerated consumer laws and titles X and XIV of the Dodd-Frank Act, including those provisions relating to unfair, deceptive, or abusive acts or practices.

The Taskforce Staff Director recommends releasing the RFI to assist the Taskforce in obtaining information about financial services markets and to give members of the public the opportunity to inform directly the Taskforce's work. The RFI requests comment and information from interested parties on which areas of the financial services markets are functioning well—that is, which areas are fair, transparent, and competitive—and which might benefit from regulatory changes that could facilitate competition and materially increase consumer welfare. The RFI asks a series of questions about the market for consumer financial products and services, including questions about products and services such as credit and mortgage products; obstacles to financial inclusion; use of consumer data; regulations the Bureau writes and enforces; and federal and state coordination. The Taskforce intends to use the public comments to inform its analyses and recommendations regarding federal consumer financial law.

## Release Sequence and Cadence Plan

The Bureau intends to release the RFI on or near March 24, 2020. External Affairs proposes the following rollout plan.

March 24, 2020

**10:30 AM            Staff-to-Staff Preview Calls**

**Office of Advisory Board and Councils (ABC)**

- Dr. Michael Baye, Chair, Academic Research Council (ARC).

- Sean Cahill, Chair, Credit Union Advisory Council (CUAC).
- Aubrey Hulings, Chair, Community Bank Advisory Council (CBAC).
- Brent Neiser, Chair, Consumer Advisory Board (CAB).

#### **Office of Intergovernmental Affairs (OIA)**

- Chuck Cross, Conference of State Bank Supervisors (CSBS) Senior Vice President, Consumer Protection & Non-Depository Supervision
- Abigail Stempson, National Association of Attorneys General (NAAG), Director National Association of Attorneys General Training and Research Institute
- Amy Henderson, Federal Reserve Board Assistant Director, Division of Consumer and Community Affairs

#### **11 am Press Release and RFI Sent to Press List and Posted to the Bureau's Website**

Communications emails the press release and RFI to reporters and coordinates with Design and Digital to post the press release and RFI on the Bureau's website.

#### **11:15 PM EA Distributes Press Release to Stakeholders**

Stakeholder Management offices will email the press release to the following stakeholder groups:

- ABC: All current advisory committee members
- OFIBL: Industry representatives and trade organizations
- OIGA: Federal, state, local, and tribal government entities
- OLA: Legislative distribution email list
- OPECL: Consumer advocacy and nonprofit organizations

#### **• KEY POINTS TO MAKE**

- Today the Bureau released a request for information to assist the Taskforce on Federal Consumer Financial Law. The comment period will close on May 20, 2020.
- Taskforce members will examine the existing legal and regulatory environment facing consumers and financial

services providers and report recommendations on ways to improve and strengthen consumer financial laws and regulations to Director Kraninger.

- The Taskforce expects to take one full year in order to produce new research and legal analysis of consumer financial laws in the United States, focusing specifically on:
  - harmonizing, modernizing, and updating the enumerated consumer credit laws—including the implementing regulations;
  - identifying gaps in knowledge that should be addressed through research, ways to improve consumer understanding of markets and products; and
  - potential conflicts or inconsistencies in existing regulations and guidance.
- The Taskforce is committed to transparency and soliciting input from the public. The questions in the RFI were informed by feedback from trade and consumer groups on March 12, and the issuance of an RFI is only one of a few opportunities for the public to provide recommendations for their work.

#### High-level background

- Historical background:
  - The taskforce is in part inspired by an earlier commission established by the Consumer Credit Protection Act (Act) in 1968. In addition to various changes to consumer law generally, the Act established a national commission to conduct original research and provide Congress with recommendations relating to the regulation of consumer credit. The commission's report contains original empirical data, information, and analyses—all of which undergird the report's final recommendations. The data, findings, and recommendations from the commission were all made public and the report led to significant legislative and regulatory developments in consumer finance.

## Post Rollout Schedule

- A public event is tentatively scheduled for June 16, 2020. The Taskforce intends to share what was heard at the March 12, 2020 Listening Session and from RFI respondents.
- During the June Advisory Committee meetings, the Taskforce will engage with the committees to share what has been heard from interested parties to date, and it will seek additional input before transitioning to developing recommendations.

Decision Memorandum from the Director

<b>FROM</b>	Kathleen L. Kraninger
<b>TO</b>	Andrew Duke, Policy Associate Director, External Affairs and CEE Kirsten Sutton, Chief of Staff, Bureau Front Office
<b>SUBJECT</b>	Request for Information to Assist the Taskforce on Federal Consumer Financial Law

I authorize the issuance and publication in the *Federal Register* of a notice titled Request for Information to Assist the Taskforce on Federal Consumer Financial Law (RFI), which would request comment and information from interested parties to assist the Taskforce on Federal Consumer Financial Law.

I also delegate joint authority to Matt Cameron as Taskforce Staff Director and Shiva Nagaraj in the Legal Division to make non-substantive changes to the RFI prior to publication.

Kathleen L. Kraninger Director Consumer Financial Protection Bureau	Date

**BUREAU OF CONSUMER FINANCIAL PROTECTION**

**[Docket No. CFPB-2020-0013]**

**Request for Information to Assist the Taskforce on Federal Consumer Financial Law**

**AGENCY:** Bureau of Consumer Financial Protection.

**ACTION:** Notice and request for information.

**SUMMARY:** The Bureau of Consumer Financial Protection (Bureau) is seeking comments and information from interested parties to assist the Taskforce on Federal Consumer Financial Law (Taskforce). The Taskforce is an independent body within the Bureau and reports to the Bureau's Director. The Taskforce is charged with developing recommendations on harmonizing, modernizing, and updating the Federal consumer financial laws, as well as identifying gaps in knowledge that should be addressed through research, ways to improve consumer understanding of markets and products, and potential conflicts or inconsistencies in existing regulations and guidance.

**DATES:** Comments must be received by May 20, 2020.

**ADDRESSES:** You may submit responsive information and other comments, identified by Docket No. CFPB-2020-0013, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Email:* **Redacted** include Docket No. CFPB-2020-0013 in the subject line of the message.
- *Hand Delivery/Courier/Mail:* Comment Intake, Bureau of Consumer Financial Protection, 1700 G Street NW, Washington, DC 20552.

*Instructions:* The Bureau encourages the early submission of comments. All submissions must include the document title and docket number. Please note the number of the question on which you are commenting at the top of each response (you do not need to answer all questions). Because paper mail in the Washington, DC area and at the Bureau is subject to delay, commenters are encouraged to submit comments electronically. In general, all comments received will be posted without change to <http://www.regulations.gov>. In addition, comments will be available for public inspection and copying at 1700 G St. NW, Washington, DC 20552, on official business days between the hours of 10 a.m. and 5 p.m. eastern standard time. You can make an appointment to inspect the documents by telephoning **Redacted**

All submissions in response to this request for information, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. Sensitive personal information, such as account numbers or Social Security numbers, or names of other individuals, should not be included. Submissions will not be edited to remove any identifying or contact information.

**FOR FURTHER INFORMATION CONTACT:** Nat Weber, Chief of Staff, or Matt Cameron, Staff Director, Taskforce on Federal Consumer Financial Law, at **Redacted**. If you require this document in an alternative electronic format, please contact

**Redacted**

## **SUPPLEMENTARY INFORMATION:**

### **I. Background**

The Director of the Bureau established the Taskforce pursuant to the executive and administrative powers conferred on the Bureau by sections 1013(a) and 1021(c) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The Taskforce is

charged with (1) examining the existing legal and regulatory environment facing consumers and providers of consumer financial products and services; and (2) reporting its recommendations for ways to improve and strengthen Federal consumer financial laws, including recommendations for resolving conflicting requirements or inconsistencies, reducing unwarranted regulatory burdens in light of market or technological developments, improving consumer understanding of markets and products and services, and identifying gaps in knowledge that the Bureau should address through future research. Where possible and within time constraints, the Taskforce's report may include recommendations relating to the 18 enumerated consumer laws and titles X and XIV of the Dodd-Frank Act, including those provisions relating to unfair, deceptive, or abusive acts or practices. The Taskforce's recommendations may include actions that the Bureau could carry out using its current authorities and actions that would require legislation to implement.

The Taskforce is inspired in part by an earlier commission established in 1968 by the Consumer Credit Protection Act (Act). In addition to various changes to consumer law generally, the Act established a national commission to conduct original research and provide Congress with recommendations relating to the regulation of consumer credit. The commission's report contained original empirical data, information, and analyses—all of which undergird the report's final recommendations. The data, findings, and recommendations from the commission were all made public and the report led to significant legislative and regulatory developments in consumer finance.

## II. Requests for Information

The Taskforce is considering what recommendations might promote the welfare of consumers in connection with the market for consumer financial products and services.

Congress created the Bureau to ensure that “all consumers have access to markets for consumer financial products and services and that markets for consumer financial products and services are fair, transparent, and competitive.”<sup>1</sup> In general, consumers benefit from markets characterized by robust competition, which can offer attractive choices and fair prices. In addition, the terms of the services must be clear, so that consumers can make informed choices, and must be free of unfair, deceptive, and abusive acts and practices.

The Taskforce is seeking information from interested parties on which areas of the consumer financial services markets are functioning well—that is, which areas are fair, transparent, and competitive—and which might benefit from regulatory changes that could facilitate competition and materially increase consumer welfare. To that end, this Request for Information asks a series of questions about the market for consumer financial products and services, with a special interest in the below markets (though respondents should feel free to suggest others):

- Automobile financing (credit or lease)
- Credit cards
- Credit repair
- Consumer reporting
- Debt collection by third parties (collection agencies)

---

<sup>1</sup> 12 U.S.C. 5511(a).

- Debt collection by creditors (in-house collections)
- Debt settlement
- Deposit accounts (checking or savings)
- Electronic payments
- Money transfers
- Mortgage origination and servicing
- Prepaid cards
- Small-dollar loans (installment, payday, vehicle title loans)
- Student loans and student loan servicing

As articulated more specifically in the questions below, the Taskforce is interested in information about how well financial markets are functioning for consumers. Efficient markets offer consumers a wide selection of products and services that meet their financial needs at competitive prices. Consumers can capture those benefits when they have truthful information about the prices and features of the products and services they seek. By contrast, markets that perform poorly are less likely to deliver products and services or offer them at prices commensurate with cost, risk, and other relevant considerations. Unfair, deceptive, and abusive acts and practices deprive consumers of the benefits that transparent and efficient markets can deliver. The Bureau, through its enforcement of laws and regulations prohibiting such behavior, strives to rid markets of these impediments. It is important, therefore, that the policies, laws, and rules effectively target the problems they are intended to address.

Every statutory or regulatory change creates at least some cost—and often considerable cost—as both consumers and industry adjust to new rules and bear the cost of change. For that reason, the Taskforce is most interested in learning where changes would be most worth the cost.

In other words, the Taskforce hopes to hear from interested parties about the markets or services where a change in the rules would provide the greatest marginal benefits relative to the marginal costs.<sup>2</sup>

#### **A. Expanding Access**

These questions explore potential obstacles to financial inclusion.

1. Millions of U.S. households lack a bank account.<sup>3</sup> Should the Bureau promote greater access to banking services and, if so, how? Are alternatives to deposit accounts, such as prepaid cards and peer-to-peer electronic payments, sufficient when compared to traditional banking products? What is the evidence regarding consumers' understanding of, and experience and satisfaction with, these products?
2. One important reason for access to a bank account is to facilitate transactions. To what extent is it necessary to tie transaction services to the banking system? To what extent could transaction services and the banking system exist independently, and would independent existence raise new consumer protection risks that regulators should consider? Would reducing clearance times impact the demand for alternative products, such as check cashing, small-dollar loans, and overdraft protection? If so, to what extent?

---

<sup>2</sup> To the extent that a commenter's response to any of the questions below overlaps with its responses to the Bureau's Call for Evidence, the commenter may wish to incorporate by reference or elaborate on its prior submissions. See Bureau of Consumer Fin. Prot., *Call for Evidence* (Apr. 17, 2018), <https://www.consumerfinance.gov/policy-compliance/notice-opportunities-comment/archive-closed/call-for-evidence/>.

<sup>3</sup> Bd. of Governors of the Fed. Reserve Sys., *Report on the Economic Well-Being of U.S. Households in 2018 – May 2019* (June 5, 2019), <https://www.federalreserve.gov/publications/2019-economic-well-being-of-us-households-in-2018-banking-and-credit.htm>.

3. What steps could be taken to promote greater competition among providers of services such as payments, financial advisory services, and savings accounts? How do third-party applications, sometimes referred to as “open banking,” affect the competition? To what extent do third-party applications raise new consumer protection risks that regulators should consider?
4. There is consumer demand for short-term, small-dollar credit. What impediments exist for expanding access to short-term, small-dollar loans and ensuring that this market is fair, transparent, and competitive? What has been the impact of State and Federal efforts to regulate such credit? Is the annual percentage rate a meaningful measure for a very short-term loan? If not, what other measures might be more useful to help consumers in understanding and assessing the cost of short-term credit?
5. Some creditors are supplementing or replacing traditional methods of underwriting (which often use income, debts, credit history, and stability factors) by employing “alternative data.” Some types of alternative data clearly expand the sources of financial information, such as payment histories for rent, utilities, and other consumer obligations, and other types of alternative data appear to have little in common with traditional underwriting information. What role should the Bureau play in regulating the furnishing, reporting, and use of alternative data, and what should the Bureau consider in developing policy in this area? How should the Bureau consider alternative factors which creditors find helpful in predicting risk, but which may lack an obvious relationship with creditworthiness or have differential impacts on some consumers or groups of consumers?

6. Should the Bureau clarify its position on disparate impact theory under the Equal Credit Opportunity Act? If so, what should be the Bureau's position?

## **B. Consumer Data**

These questions explore current and future-looking topics regarding the protection and use of consumer data.

7. Both the Fair Credit Reporting Act (FCRA) and its implementing Regulation V and the Gramm-Leach-Bliley Act and its implementing Regulation P contain important protections of consumers' personal information. Are these protections sufficient? Why or why not? If not sufficient, what further protections should the Bureau or Congress consider? Are there obligations in these regulations or statutes that impose a burden not justified by the corresponding consumer benefit?
8. The FCRA requires consumer reporting agencies to "follow reasonable procedures to assure the maximum possible accuracy"; requires these agencies to disclose to a consumer the contents of the consumer's file; contains procedures for consumers to dispute the accuracy of information in these agencies' files; and requires notifications when information from these agencies' files has contributed to a user's adverse action. In addition, the FCRA's implementing Regulation V requires that data furnishers implement and maintain reasonable written policies and procedures concerning the accuracy of the data they furnish. Are these provisions designed to ensure accuracy sufficient? Why or why not? If not, what further protections should the Bureau or Congress consider? Are there obligations in these laws that impose a burden not justified by the commensurate consumer benefit?

9. Most States have enacted laws that afford consumers certain protections in the event of a data breach. There is considerable variation among these laws, including the triggering events for coverage by the law and the requirements and remedies relating to a breach. Would Federal legislation, regulation, or guidance addressing data breaches be desirable? Why or why not? Would it be desirable to have a uniform national standard for data breach obligations? Why or why not?
10. Financial technology, or FinTech, companies often use consumer data to provide new or enhanced financial products and services, but this can raise concerns about consumers' ability to protect privacy and control the use of their data. With respect to consumer data, how best can the Bureau or Congress balance between facilitating FinTech innovations that increase consumer choice and ensuring consumer protection? Do any existing technologies or practices, such as zero-knowledge proofs, raise fewer consumer protection concerns or have the potential to help regulators resolve the balance between consumer choice and consumer protection?

### **C. The Regulations**

These questions focus on the regulations the Bureau writes and enforces. Commenters are encouraged to include specific examples in their responses.

11. Are there gaps in consumer financial protections that should be filled by strengthening the Bureau's regulations? What type of protections are needed (*e.g.*, additional disclosures, substantive requirements)? How should the costs and benefits of the proposed changes be evaluated?
12. Uncertainty can increase compliance costs and litigation risk without benefitting consumers. Are there areas of significant ambiguity or inconsistency in the

regulations? Where would regulations benefit significantly from increased clarity or harmonization—both with respect to the Bureau’s regulations and with respect to overlap, duplication, or inconsistency with regulations issued by other Federal agencies? Please explain the lack of clarity and how the regulations should be clarified.

13. Where have regulations failed to keep up with rapid changes in consumer financial services markets? Are regulatory changes needed to address new products and services and the way consumers obtain them? Are there regulations that have outlived their usefulness? Are there new regulations that might be needed? Are there regulatory areas or specific regulations now sufficiently so overlapping as to be redundant?
14. Some stakeholders favor regulations with specific requirements, which draw bright lines for a company’s compliance obligations but can apply a one-size-fit-all approach. Others favor “principle-based” regulations, which can provide a company with flexibility but can create compliance uncertainty. Federal regulations currently employ both approaches (*e.g.*, Regulation Z’s highly specific disclosure rules, and Regulation V’s requirement that data furnishers implement and maintain reasonable written policies and procedures concerning the accuracy of the data they furnish). Which approach is preferable, and does this depend on the industry, the statute, or other considerations? Please explain.

#### **D. Federal and State Coordination**

The Bureau is one of many Federal agencies with supervision or enforcement responsibilities with respect to financial institutions. Having more than one agency can increase

the resources devoted to supervision and enforcement, but it can also increase the burden on the company (and costs to its customers) and may result in conflicting positions among governmental agencies. These questions focus on the costs and benefits of this overlap.

15. With respect to institutions and laws currently within the Bureau's jurisdiction, the Bureau's supervision or enforcement authority may be exclusive or shared with other regulators, depending on the institution or law in question. In cases of shared jurisdiction, the Bureau has a number of memoranda of understanding (MOUs) with other Federal agencies regarding coordination of, among other things, supervision and enforcement authority. Are these MOUs working well? Why or why not? If not, in what ways could they be improved?
16. Are changes to the shared-jurisdiction framework desirable (*e.g.*, by legislation)? In what way? For instance, would it be beneficial to assign to one agency sole (or primary) responsibility for supervising or enforcing some or all the consumer financial protection laws? Would having a single source of authority enhance or detract from competition and consumer welfare? What are the costs and benefits of overlapping enforcement jurisdiction for nonbank creditors?
17. State financial regulators typically examine a financial institution's compliance with State law, but they can also bring cases under certain Federal consumer financial protection laws. For example, a State may initiate its own action to enforce the Dodd-Frank Act and certain enumerated consumer laws. In addition, once the Bureau has decided to bring an enforcement action, the Bureau may invite States to join in the action. What are the costs and benefits to consumers and financial institutions of overlapping enforcement powers?

18. Given the jurisdictional overlap between State and Federal regulators on consumer financial markets, are there quantifiable examples of whether this overlap has led to disproportionate compliance costs for small financial institutions, such as community banks or credit unions?

## **E. Improving Consumer Protection**

These questions address overall performance of consumer protection.

19. Which markets for consumer financial products or services are functioning well—that is, which markets are fair, transparent, and competitive? Which markets might benefit from regulatory changes that could facilitate competition and materially increase consumer welfare?
20. What types of disclosures regarding consumer financial products or services are effective and what types are not? Could the content, timing, or other aspects of disclosures be improved and, if so, how?
21. How should the Bureau determine an appropriate remedy for a law violation, considering the need to correct and deter violations without creating adverse effects on competition and other unintended consequences?
22. What is the optimal mix of regulation, enforcement, supervision, and consumer financial education for achieving the Bureau’s consumer protection goals?
23. How can we best assess the efficacy of the Federal consumer financial protections in achieving their goals?

Consumer Financial Protection Bureau

**CONSUMER FINANCIAL PROTECTION BUREAU ISSUES REQUEST FOR INFORMATION TO ASSIST  
TASKFORCE ON FEDERAL CONSUMER FINANCIAL LAW**

**WASHINGTON, D.C.** — The Consumer Financial Protection Bureau (Bureau) issued today a request for information (RFI) to assist the Taskforce on Federal Consumer Financial Law (Taskforce) with recommendations on harmonizing, modernizing, and updating the federal consumer financial laws. The Taskforce is seeking information from all interested parties on how markets are functioning and what changes could materially increase consumer protection and consumer welfare. More specifically, the RFI seeks comments and other information on the following topics: expanding access to consumer financial products and services; protection and use of consumer data; regulations the Bureau writes and enforces; federal and state coordination; and improving the market for consumer financial products and services. The Taskforce is an independent body within the Bureau and reports to Director Kathleen L. Kraninger. It is charged with examining the existing legal and regulatory environment facing consumers and financial services providers and reporting its recommendations for ways to improve and strengthen federal consumer financial laws to the Bureau's Director. The Taskforce's recommendations may include actions that the Bureau could carry out using its current authorities and actions that would require legislation to implement. The Taskforce will produce new research and legal analysis of consumer financial laws in the United States, focusing specifically on harmonizing, modernizing, and updating the federal consumer financial laws—including their implementing regulations—and identifying gaps in knowledge that should be addressed through research, ways to improve consumer access to and understanding of markets and products, and potential conflicts or inconsistencies in existing regulations and guidance. The Taskforce members were announced in January 2020 and they are expected to deliver their findings to Director Kraninger within the span of one year.

The public is invited to submit written comments on the RFI. The Taskforce will carefully consider the comments before delivering its findings to the Director.
