 1. Continuing focus on inclusion by encouraging access to financial services through competitive markets;
 - Access to credit is a driver for wealth creation. Do you believe there are regulatory issues that should be addressed at the federal level to promote greater access to consumer financial products or services to underserved individuals and/or communities?
 2. Consumer protection that eliminates archaic legal and illegal practices;
 - Do you believe there are gaps or conflicts in financial regulations; redundancies in financial regulations; or areas of financial regulation where additional clarity is needed. If so, what are they? Are there legal practices that harm consumer welfare? Are there laws or regulations that have caused unintentional harm?
 3. Enhancing competition with new technologies; and
 - What trends in financial technology or FinTech are you seeing today, and what studies or regulatory reforms are needed to protect consumers while enhancing competition over the next ten to fifteen years?
 4. Improving consumer information and education.
 - Financial mobility and empower is enhanced by increases in formal education, financial education, and consumer choice. This is particularly true with vulnerable and protected populations. What actions can the Federal government take to enhance financial mobility?
