

- **Purpose:** A meeting between Task Force staff and relevant staff from OFLEO to discuss the state of access to credit across different groups, especially but not limited to disparities in gender, and any research or data related to current disparities you may be able to share.
- **Where:** WebEx/Skype/Teams. (*No formal presentation is requested from any participants*)
- **Background:** The Task Force is interested in understanding how consumer access to credit has changed across markets since the advent of ECOA and HMDA, though we are not focusing on mortgage credit. We are especially interested in understanding and comparing areas where ECOA has been highly successful with areas that have not had similar gains in equity.
- **Request:** May we meet with someone from your team to discuss this? If so, whom? We anticipate sending out a meeting invite in the next two weeks.
